

Giant Campus is offering **George Mason University employees** a discount on [Cybercamps](#), a summer computer and technology program for youth ages 7 - 18. In the week-long programs, kids are taught skills in technology, such as Web design, Flash animation, programming, game design, robotics, and more. We also offer a totally customizable, super-cool camp called livewire at Walt Disney World Resort in Florida, where teens ages 14-18 are immersed in the latest technology, make new friends and create lifelong memories.

The Deal: Save \$50 for the first week of Cybercamp, and \$100 off each additional week. These discounts *may* (yes, *may*!) be combined with any other discounts being offered, so your savings could be more. Save \$100 on [Livewire at Disney](#).

You may register online at [Cybercamps](#) or by calling 888-904-CAMP (2267). Be sure to use the promotion code **GMUSAVE** to receive the special Cybercamps savings and use **GMULIVE** to receive the special Livewire at Disney discount.

Visit [Cybercamps](#) for locations across the country.

If you have any questions about Cybercamps, please call 888-904-CAMP (2267).
